

## PRODUCT INFORMATION

# PLASTIC MEDIA DUROPLAST

**Description:** Synthetic fine blasting medium made of duroplastic.

**Applications:** Debarring of aluminium and zinc die cast parts and electronic components. Decoating without tolerance change or surface compaction of powder-coated parts, sports boats, automobile and aircrafts parts of aluminium or magnesium. Cleaning of steel and chrome-plated moulds in the rubber and plastic industries; injection-moulded or extruder screws; in the restoration of monuments.

**Use:** Pressure blasting and wheel blast.

## SIEVING RANGES

Size	my	also Type A in mesh-sizes:	
size I	800 - 1600	12/16	30/40
size II	500 - 800	16/20	40/60
size III	200 - 500	20/30	60/100

## CHEMICAL COMPOSITION

Type A		Type B	
cured urea-formaldehyde resin urea	50%	cured melamine-formaldehyde resin	50%
Cellulose	24%	Cellulose	24%
Formaldehyde	24%	Formaldehyde	24%
filler and additives	2%	filler and additives	2%

## TECHNICAL DATA

Property	ripple granules
Specific weight	1.50 g/cm <sup>3</sup>
Bulk weight	0.77 kg/l
Hardness according to Mohs:	3.5
